Subject: FYI

Steve Hall indicated Jim grey will be the SEDS person for the sampling. they intend to have a very generic sampling plan by next week. We will target the 2 local facilities first to get a feel for the sampling needs. the following facilities are targeted:

Grace Facilities: 1. Irondale, Alab.-Active Exf.  
2. Pompano, Fla-active Exf  
3. Enoree, SC-active Mine

*= 2 B'ham*

Other → 4. Tampa, active exp., former Grace, now another owner *712*  
5. Atlanta, former grace exp., not active  
6. Atlanta, former exp. not grace, not active *Anitox*  
7. NC, former grace, currently unrelated business  
8. carolina vermiculite mine, SC

We have contracted a lab (EMSL) in New jersey for analysis. We will utilize the PLM method followed by the dust-generating TEM method as referenced in the HQ memo. Hopefully sampling will begin before the end of the month.
